Tableau Fundamentals

SQL Fundamentals for Data Analysts

Tableau Fundamentals Case Study - Ecommerce Analysis

Nov 22, 2025

Mark Lizotte

has successfully completed the online, non-credit Specialization

BI Essentials for Finance Analysts (Tableau Edition)

This specialization helps analysts advance their data analysis skills by learning to manipulate, transform, and visualize data in Tableau, one of the most widely used data visualization tools. Analysts will also learn how to source data from a database using SQL. Finally, students will complete a case study evaluating the key metrics of an E-commerce company, and creating two dashboards that can be shared as part of a personal project portfolio.

Ryan Spendefon

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses.
