

4 Courses

Pillar #1: Drug Development
- From Bench to Bedside

Pillar #2: Drug Utilization -
Drivers and Consequences

Pillar #3: Drug Effectiveness
- Real-World Evidence

Pillar #4: Drug Safety -
Pharmacovigilance

Dec 28, 2025

Mark Lizotte

has successfully completed the online, non-credit Specialization

Drug Development and Pharmacoepidemiology

Pharmacoepidemiology is a scientific discipline that uses epidemiological methods to evaluate the use, benefits and risks of drugs, devices and biologicals. It focuses on observational research methods that use data which are generated in the usual care of patients. This four-course specialization teaches: The drug development process; Methods for assessing use of products with real-world data; Observational methods for effectiveness evaluation; Methods for pharmacovigilance and safety evaluation.
